April 2, 1996

To the Associates of Interscope Mfg. , Inc.,

During the past 18 months, Honda Engineering North America successfully completed the major model change of the 1996 Civic and we are currently on the last stage of modifications for the Acura CL. Through the efforts of suppliers like Interscope Mfg. , Inc., the Civic is a huge success and we anticipate the Acura CL will also enjoy the same success.

We realize that the demands on Interscope Mfg. , Inc. and your associates were difficult and sometimes overwhelming. However, without your efforts to supply us with quality parts in a timely manner we could not have achieved our goals.

We are currently in the design stage for what is going to be the busiest time in EGA's history. The magnitude of this project will challenge everyone's abilities. We at Honda Engineering are confident that Interscope Mfg. , Inc. will also meet the challenge and provide outstanding service and quality in a timely manner and at a reasonable cost. We are proud to have suppliers such as Interscope Mfg. , Inc. on the EGA team.

Once again thank you for your efforts!

Takeshi Imura
President
Honda Engineering North America, Inc.
